

The packaging is labeled

Clippingcrate is a reusable and removable box model of high quality and simple operation, with an exclusive system for joining sides by means of staples. It is an international patent of 360 Eco Packaging.

We offer its manufacture in standard or customizable measures both in its dimensions and in thicknesses of materials, and with a unique service of replacement of damaged parts.

Make the unarmed space profitable and a single person can assemble, disassemble and close it without tools: it is intuitive at the click of a click.

It is a novelty created to meet your needs for a long time or, if you prefer, for a single use.
